

# Primary lithium batteries

## Selector guide

The image features three Saft primary lithium batteries standing upright. From left to right:

- LS 14500**: A white cylindrical battery with "saft" at the top, "LS" in green, "14500" in black, and "Li-SOCl<sub>2</sub>" at the bottom. It also has "3.6 V" and "3 V" markings.
- LO 265XC**: A white cylindrical battery with "saft" at the top, "LO" in orange, "265XC" in black, and "Li-SO<sub>2</sub>" at the bottom. It also has "3 V" markings.
- LM 33600**: A white cylindrical battery with "saft" at the top, "LM" in purple, "33600" in black, and "Li-MnO<sub>2</sub>" at the bottom. It also has "3 V" markings.

The background is a light blue gradient with large, semi-transparent text and graphics. In the upper left, there's a large "LS 14500" graphic. In the center, there's a large "3 V" graphic. In the upper right, there's a large "LM 33600" graphic. The overall theme is industrial and technical.

Below the batteries, there is a row of eight small images illustrating various applications:

- A car being worked on.
- A soldier in camouflage gear.
- An ambulance.
- A person wearing a head-mounted display.
- A truck.
- A man driving a car.
- A helicopter in flight.
- A robotic arm.

# Saft Lithium batteries

## meeting your needs...

**For more than 31 years,  
Saft has pioneered the  
development and production  
of primary lithium cells and  
battery packs in Europe,  
North America and  
Asia/Pacific.  
Autonomy, power, voltage,  
shape, weight, service life,  
price... Saft knows how to  
tailor battery solutions you  
can count on.**

With more than 4,000 employees, 2 R&D centers, 9 manufacturing facilities and 26 local sales organizations, a product range offer covering the 3 main primary lithium chemistries of today, Saft is a truly international player in the field of batteries and power supply systems for professional, industrial, space and military uses.

Among recognized characteristics of the Saft spirit worldwide are quality, performance, reliability, openness and an ability to meet the most demanding challenges. Take advantage of them for your applications!

### Lithium power at your service

Lithium is a light metal which exhibits an exceptional specific capacity (3.86 Ah/gram) and unique electrochemical characteristics.

Combining lithium with manganese dioxide ( $MnO_2$ ) powder or low-freezing point liquid cathode

materials such as thionyl chloride ( $SOCl_2$ ) or sulfur dioxide ( $SO_2$ ), results in batteries with high energy, low weight, reduced self-discharge rate, and ability to operate under extreme conditions.

### Saft's lithium products

3 lithium chemistries are currently available:

- Lithium-thionyl chloride ( $Li-SOCl_2$ ) in *LS/LST/LSX/LSH* 3.6 V cells,
- Lithium-sulfur dioxide ( $Li-SO_2$ ) in *G/LO* 3.0 V cells,
- Lithium-manganese dioxide ( $Li-MnO_2$ ) in *LM* 3.0 V cells.

# ...exceeding your expectations

The LS and LST cells are *cylindrical* and based on the high-energy concentric "bobbin" electrode configuration. They are available in standard, "C" and "W" versions according to the temperature characteristics of the envisioned applications.

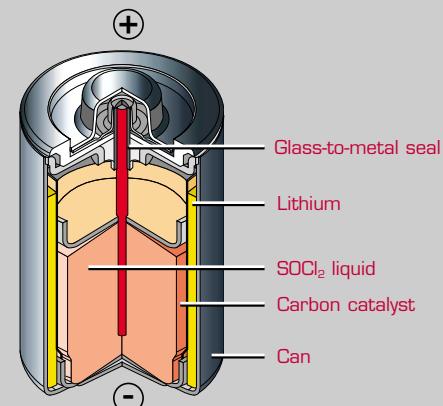

The LSX, LSH, G, LO and LM cells are also *cylindrical* but use the power-optimized "coiled" and "spiral" electrode constructions. The Li-SO<sub>2</sub> cells are available in "SX" and "G" standard versions and in *high pulse capability* "SHX" versions.

The spiral LM cell series is completed with 3 button cells aimed at memory back-up.

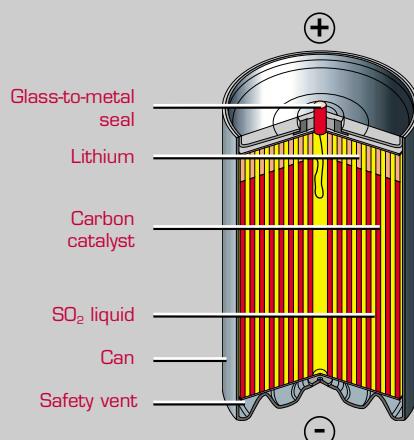

Corrosion-proof containers, hermetic sealing based on rugged glass-to-metal seals and TIG or laser welds, built-in safety vents and individual protection fuses are design features common to most of Saft's lithium cells.

The LS/LST/LSX/LSH/G/LO/LM cells are available as single units (with different optional finishes) or assembled within battery packs.

Whatever your application, you will probably find a Saft lithium battery able to meet your particular requirements. If not, custom-made solutions can be developed within your time-to-market constraints.

**Bobbin construction (small LS, LST)**

**Spiral construction (LO, G)**

## Saft primary lithium batteries: applications

|  | Memory back-up | Real-time clocks | Utility metering AMR | Security Alarms | Electronic toll collection | Automotive electronics | Radio communication | Emergency location Buoys | Lighting Night vision | Medical defibrillators | Downhole logging | Meteorology Space | Professional electronics | GPS/GSM tracking |

● recommended

○ possible

# Key features

Primary cells and batteries are not rechargeable.

- **High and stable operating voltage**

- Above 3 V for LS/LST/LSX/LSH cells.
- Above 2 V for LO/G/LM cells.

- **Wide current capability range**

From a few microamperes base current for the LM buttons and small LS/LST cells to more than 10 A pulses for some LO, G, and LM cells.

- **Wide operating temperature range**

From - 60°C up to +85°C depending on cell type, current drain and environment conditions.

- **Long shelf life**

Capacity loss in storage at +20°C below 1% (LS, LST, LM), 2% (LSX) and 3% (LSH, G, LO) per year.

- **Extended operating life**

Typically above 5 years, and up to 15 years for some applications.

- **High energy densities**

3-10 times greater than the non-lithium systems.

- **Disposal**

According to local regulations.

- **Adequate safety**

Most of Saft's lithium cells are UL (Underwriters Laboratories) recognized, non-restricted for transport and EN 50020 approved. Most battery packs comply with European and US Army standards.

- **Storage**

The storage area should be clean, cool (not exceeding +30°C), dry and ventilated.

## Saft primary lithium chemistries: specific qualities

- **Li-SOCl<sub>2</sub>** (LS, LST, LSX, LSH cell series)

- Operating voltage > 3 V
- Ability to operate from - 60 to +85°C
- Non-flammable electrolyte
- Cells non-pressurized at room temperature
- Hermeticity guaranteed up to +110°C
- Unrivaled nominal capacities (LS, LST)

- "C" cell versions are recommended for use in Cool environments, typical of indoor applications. They yield higher voltage during pulsing at temperature not exceeding repeatedly +55°C.
- "W" cell versions are recommended for use in applications with Widely fluctuating temperature (up to +95°C), such as electronic toll collect.
- "SHX" cell versions offer superior pulse capability for discharges not exceeding the declared voltage cut-off.

- **Li-SO<sub>2</sub>** (G, LO cell series)

- Non-flammable electrolyte
- Superior pulse capability
- Excellent capacity above 1 A
- Superior power at - 40°C
- Hermeticity guaranteed up to +95°C
- Wide military acceptance

- **Li-MnO<sub>2</sub>** (LM cell series)

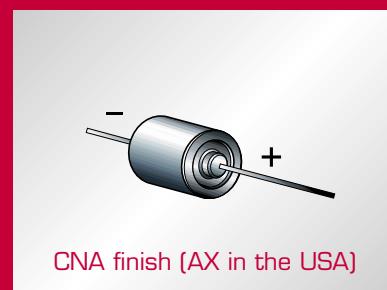

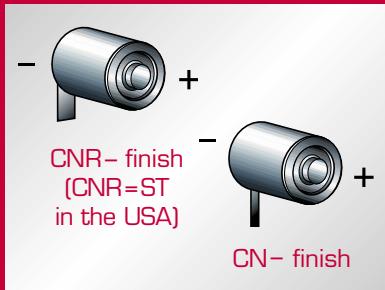

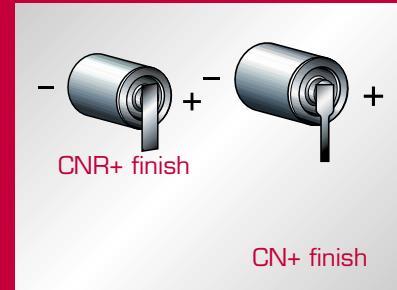

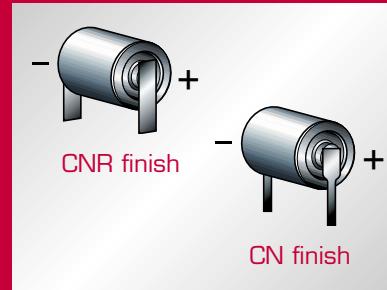

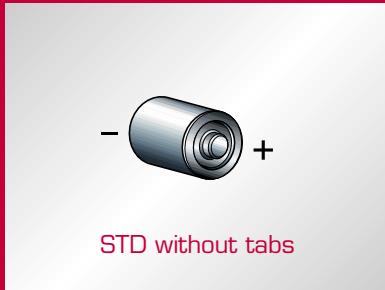

- Non-corrosive electrolyte
- Cells non-pressurized at room temperature
- Spiral cells with good pulse capability
- Minimal voltage delay
- Competitive capacity at high current and low temperature (- 40°C)

## Saft lithium cell series: performance data

Enclosed data relates to batteries aged up to 12 months and properly stored. Consult Saft regarding specific pulse conditions or usage following prolonged storage and/or exposure to extreme temperatures.

- Nominal capacity at +20°C and 2 V discharge cut-off (continuous current).
- Maximum recommended continuous current:
  - LS/LST/LSX bobbin and coiled cells : the current providing 50% of the nominal capacity at +20°C and 2 V cut-off.
  - LSH/G/LO/LM spirals : the above definition or the current that keeps the cells self-heating within safe limits, whichever is smaller.
- Maximum recommended pulse current : varies according to pulse characteristics (duration, frequency), temperature conditions, cell storage conditions prior to usage and the application's acceptable minimum voltage. The use of parallel capacitor to enhance the voltage at the beginning of pulses might be recommended. Consult Saft.
- Transport status: according to UN model Regulations Ref. ST/SG/AC.10/1 Revision 13 (2003) and Manual of Tests and Criteria Ref. ST/SG/AC.10/11 Revision 3, Amendment 1 "Lithium Batteries" – 2002.

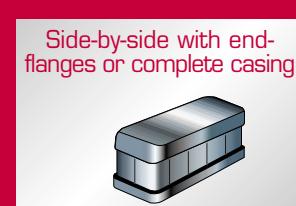

## Examples of standard individual cell tabbing arrangements

Other cell finishes are available upon request

Check availability and dimensions of tabbing arrangement for considered cell

## Examples of standard battery packs configurations

# Primary lithium batteries

## Li-MnO<sub>2</sub> range

### Li-MnO<sub>2</sub> cells

| Production site | Size | Open circuit voltage | Nominal voltage | Nominal capacity (drain) | Maximum recommended continuous current | Operating temperature range | Outside diameter max. | Height max. | Weight | UL recognition | Transport status |
|-----------------|------|----------------------|-----------------|--------------------------|--|-----------------------------|-----------------------|-------------|--------|----------------|------------------|
|-----------------|------|----------------------|-----------------|--------------------------|--|-----------------------------|-----------------------|-------------|--------|----------------|------------------|

#### LM button cells

|         |   |          |       |     |                  |      |            |         |        |       |     |                |
|---------|---|----------|-------|-----|------------------|------|------------|---------|--------|-------|-----|----------------|
| LM 2032 | F | 20x3.2mm | 3.3 V | 3 V | 235 mAh (0.2 mA) | 3 mA | -20/+60°C  | 20.0 mm | 3.2 mm | 2.9 g | yes | Non-restricted |
| LM 2430 | F | 24.5x3mm | 3.3 V | 3 V | 285 mAh (0.2 mA) | 3 mA | -20/+60°C* | 24.5 mm | 3.0 mm | 4.0 g | yes | Non-restricted |
| LM 2450 | F | 24.5x5mm | 3.3 V | 3 V | 540 mAh (0.2 mA) | 3 mA | -20/+60°C  | 24.5 mm | 5.0 mm | 6.0 g | yes | Non-restricted |

\* Operating temperature range extended to -20/+70°C for the resin-encapsulated Memoguard 40 LH or LF 220 versions

#### LM spiral cells

|          |     |           |       |     |                           |         |            |         |         |        |     |                |
|----------|-----|-----------|-------|-----|---------------------------|---------|------------|---------|---------|--------|-----|----------------|
| LM 17130 | USA | 1/3 A     | 3.3 V | 3 V | 500 mAh (4.5 mA to 2.0 V) | 300 mA  | -40/+70°C* | 16.7 mm | 16.6 mm | 8.0 g  | —   | Non-restricted |
| LM 22150 | USA | 1/3 sub-C | 3.3 V | 3 V | 900 mAh (40 mA to 2.0 V)  | 400 mA  | -40/+70°C* | 22.8 mm | 17.3 mm | 15.0 g | —   | Non-restricted |
| LM 26500 | UK  | C         | 3.3 V | 3 V | 4500 mAh (500 mA)         | 1000 mA | -40/+70°C* | 25.6 mm | 51.0 mm | 60 g   | --- | Class 9        |
| LM 26600 | UK  | 5/4 C     | 3.3 V | 3 V | 5500 mAh (500 mA)         | 1200 mA | -40/+70°C* | 25.6 mm | 61.5 mm | 72 g   | —   | Class 9        |
| LM 33570 | UK  | "short" D | 3.3 V | 3 V | 9000 mAh (1000 mA)        | 3000 mA | -40/+70°C* | 34.0 mm | 57 mm   | 107 g  | —   | Class 9        |
| LM 33600 | UK  | D         | 3.3 V | 3 V | 10500 mAh (1000 mA)       | 3000 mA | -40/+70°C* | 34.0 mm | 61.3 mm | 116 g  | —   | Class 9        |

\* Cells leakproof up to +80°C

### Li-MnO<sub>2</sub> Military battery packs

| Cell type construction*       | Open circuit voltage | Nominal voltage | Voltage cut-off | Nominal capacity | Maximum dimensions | Weight | NATO stock number | Typical applications                    |
|-------------------------------|----------------------|-----------------|-----------------|------------------|--------------------|--------|-------------------|---|
| BA 5368/U<br>4s1p<br>LM 22150 | 13.2 V               | 12 V            | 9 V             | 900 mAh          | 76.2 x 26.9 mm     | 145 g  | 6135-01-455-7947  | Radiocommunication (PRC-90-103-106-195) |
| BA 5372/U<br>2s1p<br>LM 17130 | 6.6 V                | 6 V             | 4 V             | 500 mAh          | 16.5 x 33.0 mm     | 20 g   | 6135-01-214-6441  | Radiocommunication (SINCGARS)           |

\* Xs Yp = Y parallel branches of X cells in series per branch

# Serving your needs around the world

## Saft Lithium Battery Group sales network

### Australia

Saft Australia Pty Ltd  
Unit 18/167 Prospect Highway,  
Seven Hills, NSW 2147  
Tel +61 3 9465 5734  
Fax +61 3 9465 6213  
gary.piper@saftbatteries.com.au

### China

Saft Hong Kong Ltd  
Unit 1107-9, 11/F, Westin Centre  
26 Hung To Road,  
Kwun Tong, Kowloon  
Tel +852 2796 9932  
Fax +852 2798 0619  
ivan.lam@saftbatteries.com

Alcatel Telecom Equipment  
(Shanghai) Co. Ltd,  
39 # No. 275 Basheng Road,  
Waigaoqiao Free Trade Zone,  
Shanghai 200131  
Tel +86 21 586 66405  
Fax +86 21 586 66403
