# SENSITIVE SCRs

(0.8 - 10 Amps)

## GENERAL DESCRIPTION

The Teccor Electronics, Inc. line of sensitive SCR semiconductors are half-wave unidirectional gate-controlled rectifiers (SCR-thyristor) which complement Teccor's line of power SCRs. This group of packages offers ratings of 0.8-10 amps, and 50-600 volts with gate sensitivities of 1.0-500 microamps. If gate currents in the 1-50 milliamp ranges are required, please consult Teccor's non-sensitive SCR technical data sheets.

## ELECTRICALLY ISOLATED PACKAGES

This group of Teccor sensitive SCRs is available in a choice of three different product packages. The TO-220AB and TO-92 are electrically isolated where the case or tab is internally isolated to allow the use of low cost assembly and convenient packaging techniques.

## GLASS PASSIVATION

Teccor's line of SCRs features glass-passivated junctions to ensure long term device reliability and parameter stability. Teccor's glass offers a rugged, reliable barrier against junction contamination.

Tape-and-reel packaging is available for the TO-92 package. Please consult factory for more information.

Variations of devices covered in this data sheet are available for custom design applications. Please consult the factory for more information.

## Features

- Electrically Isolated Packages
- High Voltage Capability up to 600 volts
- High Surge Capability - up to 100 amps
- Glass Chip Passivation

# Electrical Specifications

## GENERAL NOTES

- The case temperature ( $T_C$ ) is measured as shown on dimensional outline drawings. See "Package Dimensions" section of this catalog on Page 95.
- All measurements (except  $I_{GT}$ ) are made with an external resistor  $R_{GK} = 1k\Omega$  unless otherwise noted.
- All measurements are made at 60Hz with a resistive load at an ambient temperature of  $+25^\circ\text{C}$  unless otherwise specified.
- Operating temperature ( $T_J$ ) is  $-65^\circ\text{C}$  to  $+110^\circ\text{C}$  for "EC" Series devices;  $-65^\circ\text{C}$  to  $+125^\circ\text{C}$  for "2N" Series devices; and  $-40^\circ\text{C}$  to  $+110^\circ\text{C}$  for all others.
- Storage temperature range ( $T_S$ ) is  $-65^\circ\text{C}$  to  $+150^\circ\text{C}$  for TO-92 devices;  $-40^\circ\text{C}$  to  $+150^\circ\text{C}$  for TO-202 devices; and  $-40^\circ\text{C}$  to  $+125^\circ\text{C}$  for all others.
- Lead solder temperature is a maximum of  $+230^\circ\text{C}$  for 10 seconds maximum  $\geq 1/16"$  (1.59mm) from case.

## GENERAL NOTES

- Teccor 2N5060 and 2N6564 Series devices conform to all JEDEC registered data.
- The case temperature ( $T_C$ ) is measured as shown on dimensional outline drawings. See "Package Dimensions" section of this catalog on Page 95.
- All measurements (except  $I_{GT}$ ) are made with an external resistor  $R_{GK} = 1k\Omega$  unless otherwise noted.
- All measurements are made at 60Hz with a resistive load at an ambient temperature of  $+25^\circ C$  unless otherwise specified.

- Operating temperature ( $T_J$ ) is  $-65^\circ C$  to  $+110^\circ C$  for "EC" Series devices  $-65^\circ C$  to  $+125^\circ C$  for "2N" Series devices; and  $-40^\circ C$  to  $+110^\circ C$  for all others.
- Storage temperature range ( $T_S$ ) is  $-65^\circ C$  to  $+150^\circ C$  for TO-92 devices;  $-40^\circ C$  to  $+150^\circ C$  for TO-202 devices; and  $-40^\circ C$  to  $+125^\circ C$  for all others.
- Lead solder temperature is a maximum of  $+230^\circ C$  for 10 seconds maximum  $\geq 1/16"$  (1.59mm) from case.

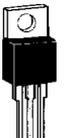

# Electrical Specifications

## THERMAL RESISTANCE (STEADY STATE) $R_{\theta JC}$ [ $R_{\theta JA}$ ] °C/W (TYPICAL)

				
	TO-92	THERMOTAB TO-220AB	TYPE 2 TO-202AB	TYPE 1 & 3 TO-202AB
<b>0.8 amp</b>	<b>75 [160]</b>			
<b>1.5 amps</b>	<b>50 [160]</b>			
<b>3.0 amps</b>		<b>6 [65]</b>		
<b>4.0 amps</b>			<b>10 [100]</b>	<b>6.2 [80]</b>
<b>6.0 amps</b>		<b>4.0</b>		<b>4.3</b>
<b>8.0 amps</b>		<b>3.4</b>		<b>3.9</b>
<b>10.0 amps</b>		<b>3.0</b>		<b>3.4</b>

## ELECTRICAL ISOLATION FROM LEADS TO MOUNTING TAB

TYPE		
VAC(RMS)	TO-92	THERMOTAB ** TO-220AB
<b>1600</b>	<b>STANDARD</b>	—
<b>2500</b>	<b>N/A</b>	<b>STANDARD</b>
<b>4000</b>	<b>N/A</b>	<b>OPTIONAL*</b>

\* For 4000V Isolation use "V" Suffix in part number

\*\* UL Recognized File #E71639

## ELECTRICAL ISOLATION

Most Teccor isolated sensitive SCRs will withstand a minimum high potential test of 2500 VAC RMS from leads to mounting tab over the device's operating temperature range. See table for other standard and optional isolation ratings.

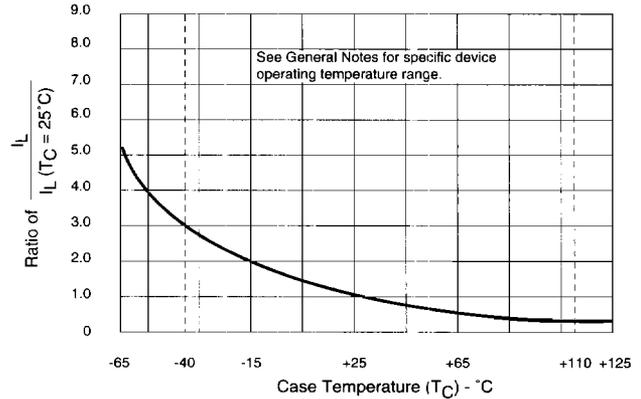

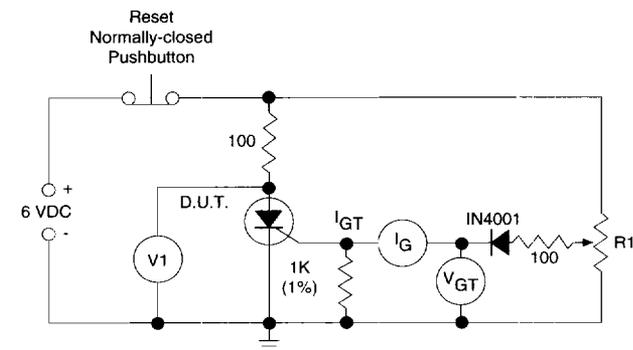

Figure 15 — Simple Test Circuit For Gate Trigger Voltage and Current Measurement

**NOTE:**

- V1 — 0 - 10 volt DC meter
- V<sub>GT</sub> — 0 - 1 volt DC meter
- I<sub>G</sub> — 0 - 1mA DC milliammeter
- R1 — 1K potentiometer

To measure gate trigger voltage and current, raise gate voltage (V<sub>GT</sub>) until meter reading V1 drops from 6 volts to 1 volt. Gate trigger voltage is the reading on V<sub>GT</sub> just prior to V1 dropping. Gate trigger current I<sub>GT</sub> can be computed from the relationship:

$$I_{GT} = I_G - \frac{V_{GT}}{1000} \text{ Amps}$$

where I<sub>G</sub> is reading (in amps) on meter just prior to V1 dropping.

**Note:** I<sub>GT</sub> may turn out to be a negative quantity (trigger current flows out from gate lead).
